What's New For Taxable Years Beginning On Or After January 1, 2009

Effective January 1, 2009, the General Assembly passed Senate Bill 1338 changing the criteria for the qualified business. The credit is limited to \$3 million. Beginning in 2009, one-half of this amount must be allocated to commercialization investments and the other half is available for all other qualifying investments. If credit applications for either half exceed \$1.5 million, the credits for that half will be prorated. If credit applications for either half are less than \$1.5 million, the balance will be available for allocation to the other type of credits.

General Information Concerning This Credit

The Qualified Equity and Subordinated Debt Investments Tax Credit is allowed to **taxpayers** making a qualified investment in the form of equity or subordinated debt from a **qualifying business** which is engaged in business or does substantially all of its production in Virginia. The credit equals 50% of the amount of qualifying investments made during the taxable year. The total amount of credit that may be used per taxable year is the lesser of the tax imposed or \$50,000. The credit is nonrefundable. Excess credits may be carried forward for up to 15 years. If total annual requests for this credit exceed \$3 million, the Department of Taxation will prorate the allowable credit for each taxpayer.

Equity and/or Subordinated Debt received in connection with a qualified business investment must be held by the taxpayer for at least three full calendar years following the calendar year for which the tax credit is allocated except in the following instances: the liquidation of the qualified business issuing such equity; the merger, consolidation or other acquisition of such business with or by a party not affiliated with such business; or the death of the taxpayer.

If the three calendar year holding period is not met, the taxpayer forfeits the unused credit amount and will be assessed for the credit used, to which shall be added interest, computed at the rate of one percent per month, compounded monthly from the date the tax credits were claimed.
