Purpose

Web Upload provides server to server functionality through Secure File Transfer Protocol (SFTP). This functionality allows transmissions of multiple tax returns and their payments. This document addresses forms supported by the Virginia Department of Taxation (Virginia Tax) and provides the tax return details for the following forms:

Withholding Tax

- VA-5 Monthly/Quarterly Withholding Return
- VA-15 Semi-Weekly Withholding Return
- VA-16 Quarterly Withholding Reconciliation
- VA-6 Annual Withholding Reconciliation

Income Tax Statements

NOTE: This SFTP guide provides details for the server-to-server functionality only. Review the [Employer W-2 and 1099 Electronic Guidelines](#) for details on formatting your files per the SSA's EFW2 guidelines and the IRS's Publication 1220.

- W-2 Wage and Tax Statement
- 1099-R Distributions from Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.
- 1099-MISC Miscellaneous Income

Sales Tax

Beginning Feb 1, 2020 all sales tax filers are required to follow the specifications for the applicable sales tax file layouts detailed on pages 15 - 20. These new file layouts may be used for any filing period (including past filing periods).

- Use-2020
- Sales-2020
- Sales-2020-MultipleLocalities

File Layout specifications used filing periods prior to February 1, 2020

- ST-8 2018 Out of State Use Tax Return
- ST-9 2018 Sales and Use Tax Return (Multiple Localities)
- ST-9 2018 Sales and Use Tax Return (Single Locality)
- Revised ST-8 Out of State Use Tax Return – Use
- Revised ST-9 Sales and Use Tax Return (Multiple Localities)
- Revised ST-9 Sales and Use Tax Return (Single Locality)

Schedule VK-1 – Owner's Share of Income and Virginia Modifications and Credits

P2P – Peer-to-Peer Vehicle Sharing Tax Return

The above returns can only be submitted for customers that are registered with us for that tax type. Returns submitted for unregistered accounts cannot be processed.

The Department does not, at present, support International ACH (IAT) Debit transactions. See the [Electronic Payment Guide](#) for additional information.

Filing Reminders and Changes

Beginning October 1, 2020: If you live in the Central Virginia region, you have seen an increase in the sales and use taxes you pay. Starting Thursday, Oct. 1, 2020, the sales and use tax rates go up by 0.7% for a total of 6%. This includes the 4.3% state tax, the new 0.7% regional state tax and the 1% local option tax. The increase applies to sales made in the city of Richmond and the counties of Charles City, Chesterfield, Goochland, Hanover (including the town of Ashland), Henrico, New Kent and Powhatan. The rate increase does not apply to food purchased for home consumption (such as groceries), or essential personal hygiene products. These are still taxed at the reduced rate of 2.5%.

P2P Peer-to-Peer Vehicle Sharing Tax Is a new tax that went into effect on October 1, 2020. This is a tax on the use of a shared vehicle arranged through a peer-to-peer vehicle sharing platform. The platform collects the tax from the person booking the vehicle, then sends the funds to Virginia Tax.

Tax Rates: Rates are determined based upon the number of vehicles the shared vehicle owner has registered on any combination of vehicle sharing platforms.

“Large fleets” = vehicle owner has more than 10 vehicles registered on vehicle sharing platforms.

“Small fleets” = vehicle owner has 10 or fewer vehicles registered on vehicle sharing platforms

Questions and Support

If you have questions / need additional information regarding [Web Upload](#), contact the Web Upload SFTP Business Administrators at webupload@tax.virginia.gov. Do NOT include account specific information in the e-mail.

For tax type specific information, see our website www.tax.virginia.gov.

Signing Up for SFTP

New Web Upload Users – In order to sign up for SFTP, you must first sign up for Web Upload. Marking the “Server to Server Processing” checkbox located on the Web Upload Sign Up page will initiate the SFTP sign up process. You must provide your external IP Address after marking the “Server to Server Processing” check box.

Information required when signing up for Web Upload: First Name, Last Name, Email Address, PTIN/FEIN/SSN, Role, Company Name, Phone Number and Password.

Existing Web Upload Users – Mark the “Server to Server Processing” check box located on your My Profile page and provide your external IP Address.

The Web Upload Administrator will contact you about your Server to Server set up request. You will be required to complete a Memorandum of Agreement (MOA). Once the MOA is received, your set up can be completed. This process takes approximately 2 – 3 weeks. Once your access is complete, you will receive a call from a Web Upload SFTP Business Administrator to provide you with your SFTP password information.

Testing

You may test your system with SFTP prior to sending live data, but you are not required to do so. If you decide to test, you must use the SFTP Test ID provided in the SFTP Confirmation Email. Once you submit a test file, contact the Web Upload SFTP Business Administrators at webupload@TAX.virginia.gov. You will receive a “results” file for each test file you submit. See **Results Files** for additional details.

File Formatting

Files must be submitted in either a Positional or Delimited (with *tab* field delimiter) format. However, the W2, 1099MISC and 1099R files must be submitted in the Positional format only.

- “P” must be designated in the file name to identify the file format as “positional”.
- “D” must be designated in the file name to identify the file format as “delimited”.

File Naming Convention

Web Upload uses the file naming convention to determine form type and the format of your file (delimited vs. positional) and processes it accordingly. You must include this information in this order when naming a file.

- Company Name
- File Number Counter (Required when sending multiple files in the same day)
- Underscore (_)
- Return type in file: VA5, VA15, VA16, VA6, RevisedST9MultipleLocalities, RevisedST9SingleLocality, RevisedST8, VK1, W2, 1099MISC or 1099R. Beginning Feb 1, 2020, the following return types must be included in the file name for all sales tax submissions: Use-2020, Sales-2020, Sales-2020-MultipleLocalities and P2P-2020. Beginning Oct 1, 2020, P2P-2020 items may be submitted.
- Underscore (_)
- Date file uploaded (MMDDYY)
- Underscore (_)
- File format
 - P = Positional files
 - D = Delimited files

Example: PretendTaxShop_VA5_052220_P

NOTE: As displayed in the example above, there should be no spaces in the “Company Name” when naming files.

Remember – If you submit more than one file in a day, you **MUST** modify the “Company Name” by adding a “File Number Counter” to it to identify the new file as a separate file. Otherwise, the risk of overwriting files of the same name may occur.

Example: PretendTaxShop1_VA5_052220_P
PretendTaxShop2_VA5_052220_P
PretendTaxShop3_VA5_052220_P

File Format Requirements

General File Information

- Do NOT encrypt your file or the entire file will be rejected. The SFTP channel will be encrypted.
- Ensure your file is not empty.
- Ensure your file contains a valid form type: VA5, VA15, VA16, VA6, RevisedST9MultipleLocalities, RevisedST9SingleLocality, RevisedST8, Use-2020, Sales-2020 and Sales-2020-MultipleLocalities, VK1, W2, 1099MISC, 1099R or P2P-2020.
- No header or footer records are allowed in your file.
- Web Upload will “ignore” (i.e. not process) any records with errors. These records must be corrected and resubmitted.

Sales Tax and Withholding Tax Return Information

- Even when no tax due is due (i.e. “zero due” return) you must file that return. Enter all zeroes (0.00) for “zero due” returns.
- All returns, including “zero due” returns, must contain all required fields.

Sales Tax and Withholding Tax Payment Information

- Enter dollar, cents and decimal points for all payment amounts.
- Do NOT enter dollar signs.
- Each record with a payment must contain its own payment and banking information.
- If a payment is not being made for a record, enter “0.00” in the payment amount field. For the number/routing number fields: blank fill for positional and leave the field empty for delimited.

File Directory

When you submit your file, use the Directory Folder named “Dropoff”.

Batch jobs are scheduled to run every 30 minutes to retrieve and process the submitted file. This schedule applies to files submitted via the SFTP Live ID.

When submitting files using the Test ID, email the Web Upload SFTP Business Administrators (webupload@tax.virginia.gov), as this part of the testing process is not automated. They will have the file processed and let you know when Results Files are ready.

Results Files

A “Results” file will be provided for each file submitted. Retrieve the “results” file from the Directory Folder named “Pickup”. You are also responsible for deleting that file from that Directory Folder. This applies to files submitted with the Live ID and with the Test ID.

The word “Results” will be displayed in front of the file name you submitted. The example on Page 5 would display as *ResultsPretendTaxShop_VA5_052220_P*.

Each return record entry in the file will have a reference number associated to it. You have two options when choosing the reference number for the “Submission ID” field, which is the last field for every entry.

Your first option is the Line Number for each return record entry. You must leave the field empty for delimited formatted files and blank fill for positional files. Example: Line 1 = 1st record, Line 2 = 2nd record, etc.

Your second option is to provide an 11-digit number for each return record entry. You determine what the 11-digit number will be in the field. Example: 1000000015, 45645645645, etc.

If a record was processed by Web Upload, “Processed” will be followed by the Line Number or 11-digit Submission ID. This means that the record in the file passed Web Upload validation edits and no errors were found.

If a record was not processed (i.e. did not pass Web Upload validation edits), an error message will follow the Line Number or Submission ID.

Remember, these records must be corrected and resubmitted.

Processed 1111111115

If the "File Processed" section displays "false", none of the records in the file were processed through Web Upload and none will post to your customers' accounts. One example is when a Delimited file is named with the "P" to indicate a Positional file.

The [Appendix](#) of this document contains possible error messages.

NOTE: For Test files, the first line in the "results" file will be "TEST File Processed" with true or false. The rest of the "results" file will be formatted like the examples above.
